## Growth of PACE

### Definitions

- » **Has a PACE Program:** This indicates whether PACE is included in the state Medicaid program through a State Plan Amendment.
- » **Number of PACE Organizations:** This indicates the number of PACE organizations operating in the state as of January 2019.
- » **Number of Individuals Served by PACE:** This is the total census number (as of January 2019).
- » **Limits Growth of Existing Programs:** This indicates whether the state limits the growth of existing programs. The possible ways a state may limit growth include the following:
  - **Budget Cap:** State legislation caps funding for PACE programs in the state budget.
  - **Enrollment Cap (Aggregate):** State legislation sets an overall enrollment cap for all of the PACE organizations in the state.
  - **Enrollment Cap (Per Organization):** The state specifies the enrollment cap for each PACE organization.
  - **State Constraints:** Current PACE organizations have not been able to grow because the state administrative agency has limited enrollment or limited the number of eligibility determinations it will process, will not let a new center open, and/or will not allow for a service area expansion.
- » **Has a Process for Initiating New Programs:** This indicates whether the state has a formal process for starting new PACE organizations (e.g., a request for proposal).
- » **Limits New Organization Growth:** This indicates whether the state is limiting the growth of new PACE organizations. If so, the state uses one of the following methods to limit new programs:
  - **Legislation Limits Growth:** There is legislation that limits the number of PACE organizations in the state.
  - **State Constraints:** The state administering agency officially or unofficially has limited the number of new PACE organizations (e.g., by limiting the number of provider applications it will accept or review).
- » **PACE Organization Expected Growth:** This indicates whether PACE organizations are growing in the state.
  - **Provider Application(s) in Process:** The state is seeking application(s) to expand PACE or a new PACE organization(s) is under development.
  - **Center Application(s) in Process:** Existing PACE organizations are opening a new center.
  - **Service Area Expansion Application(s) in Process:** Existing PACE organizations are adding additional ZIP codes to their service area.
- » **State Legislation/Regulation Allows for For-Profits:** This indicates whether state legislation/regulation specifically states that for-profits are allowed or is silent on the issue.
- » **Has a State PACE Association:** This indicates whether a state has a State PACE Association.

<sup>1</sup> This number does not reflect all of the programs' Medicaid-only census numbers.

<sup>2</sup> The District of Columbia has enacted a budget and legislation allowing for PACE.

<sup>3</sup> While the state does not specifically limit growth, given the new level of care determination process, PACE organizations have not been able to enroll participants as quickly, which has limited growth.

<sup>4</sup> MA is not allowing new applications at this time.
