

Tabula Rasa HealthCare’s Peak Health Plan Management and eClusive Merge Operations

MOORESTOWN, NJ, Sept. 10, 2019 – Tabula Rasa HealthCare (TRHC), a leading provider of technology-enabled solutions to mitigate medication risk and improve health plan operations, today announced that its Peak Health Plan Management and eClusive units, providers of third-party administration services (TPA), have combined and now operate as PeakTPA.

PeakTPA processes insurance claims and provides “back office” services to health care organizations for optimized financial management and regulatory compliance. Services include claims adjudication, enrollment management, accounts receivable and more.

[PeakTPA](#) is the market leader in health plan management for Programs of All-Inclusive Care for the Elderly (PACE®). PACE is a federal program benefiting individuals 55 and older who are nursing home eligible. PACE includes 260 centers in 31 states serving a growing number of eligible Medicare and Medicaid participants.

“We are pleased to partner with eClusive to form the new PeakTPA team,” said Patty Bailey, CEO of PeakTPA, who served in this role for Peak Health Plan Management. “Their experience in claims adjudication, combined with Peak’s expertise and commitment to superior customer care, will enable us to deliver services that are precisely tailored to each client’s needs. Both our expanded team and our new name will be beneficial as we look to grow beyond the PACE market.”

PeakTPA operates as part of TRHC’s CareVention HealthCare Division, which focuses on providing integrated services to PACE organizations and other value-based health care providers. About 80 percent of PACE organizations use at least one CareVention service.

About Tabula Rasa HealthCare

Tabula Rasa HealthCare (TRHC) is a leader in providing patient-specific, data-driven technology and solutions that enable health care organizations to optimize patient outcomes, lower health care costs, and improve organizational performance. Medication risk management is TRHC’s lead offering, and its cloud-based software applications, including EireneRx® and MedWise®, provide solutions for a range of payers, providers and other health care organizations.
