30-Day All-Cause Hospital Readmission Rates:
Comparable rate for all age 65 dual-eligible enrollees is 22.9% and Medicare fee-for-service beneficiaries is 19.6%.

19.1%
PACE HOSPITAL READMISSION RATE of nursing home-eligible PACE participants currently reside in a nursing home.

5%
ONLY
5%
of nursing home-eligible PACE participants currently reside in a nursing home.

- Reduced Hospital Admissions: A 24 percent lower hospitalization rate than dually-eligible beneficiaries who receive Medicaid nursing home services.

- Decreased Rehospitalizations: 16 percent less than the national rehospitalization rate of 22.9 percent for dually-eligible beneficiaries age 65 and over.

- Reduced ER Visits: Less than one emergency room visit per member per year.

- Fewer Nursing Home Admissions:

Despite being at nursing home level of care, PACE participants have a low risk of being admitted to a nursing home.

- PACE participants receive home, preventive care, specifically with respect to hearing and vision screenings, flu shots and pneumococcal vaccines.

- PACE VALUE
States pay PACE programs on average 13 percent less than the cost of other Medicare services.

- In Medicare, payments to PACE organizations are equivalent to the predicted costs for a comparable population to receive services through the fee-for-service program.

- PACE enrollees are less likely to suffer depression. A study showed that 27 percent of new PACE enrollees scored as depressed on an assessment administered before enrollment. Nine months later, 80 percent of those individuals no longer scored as depressed. Participants rated their satisfaction with PACE as 4.1 out of 5. The disenrollment rate is almost 5 percent less than Medicare Advantage plans.

- The Institute of Medicine report titled “Retooling for an Aging America” recognizes PACE as a model of care with the capacity to bring geriatric expertise and care coordination to the needs of older adults.

- PACE was found to reduce family caregiver burden and provide support to improve family caregiving.

- There is high caregiver satisfaction. More than 96 percent of family members are satisfied with the support they receive through PACE, and 97.5 percent of family caregivers would recommend PACE to someone in a similar situation.

- No family member reported a high caregiver burden at the time their loved one enrolled in PACE, more than 54 percent experienced less burden after enrollment.

- PACE enrollees are less likely to suffer depression. A study showed that 27 percent of new PACE enrollees scored as depressed on an assessment administered before enrollment. Nine months later, 80 percent of those individuals no longer scored as depressed.

- Participants rated their satisfaction with PACE as 4.1 out of 5. The disenrollment rate is almost 5 percent less than Medicare Advantage plans.
